

Makarewa

SCHOOL

HOOKED ON LEARNING | SKILLS FOR LIFE

Pūmau ki te ako

Pūkenga mo āke tonu atu

Makarewa School is situated 8 km north of Invercargill on State Highway 6 and provides education for children from new entrants to Year 6.

The school mission statement for Makarewa School.

Makarewa School exists to provide high-quality learning in a safe, caring environment which values diversity and prepares students for an ever-changing world.

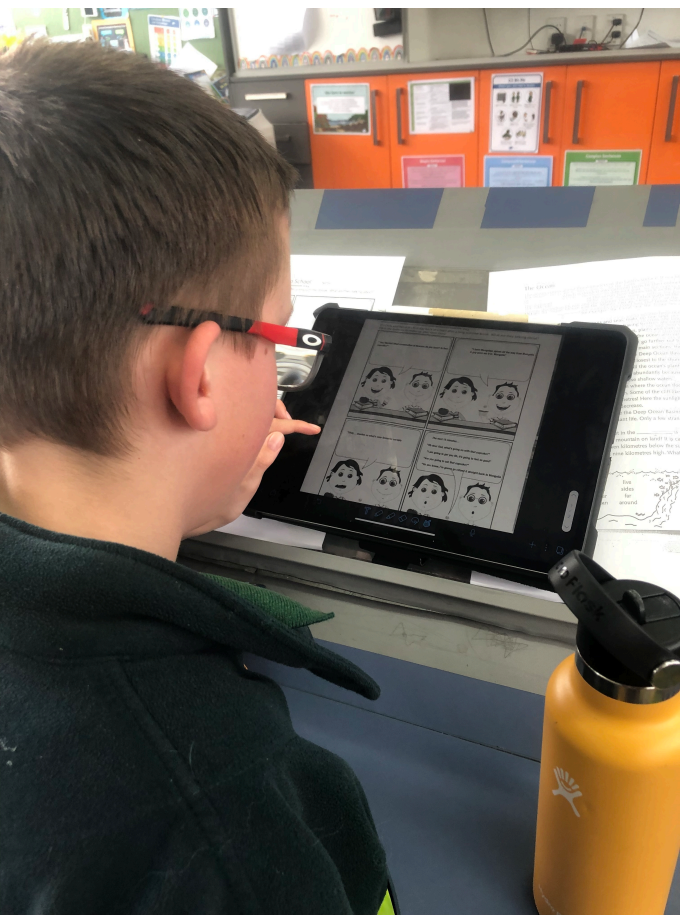

We have made sure each class has at least 3 iPads, with more available in the junior part of the school. We chose iPads because they are easy for children to use, and there are a wide variety of apps that can be used to support learning.

Deployment and Management

Makarewa School has been working with Online Computers for over 20 years. The products are all purchased at education pricing via Online Computers and loaded into the Device Enrolment Program at no cost to the school.

Online Computers have helped them enrol each iPad into the Jamf MDM platform.

Once in Jamf all the apps and settings are managed from a central location. This has helped the school move their devices from the box to the classroom, with ease, into the hands of the students where they should be.

The iPads are used to support learning in a variety of ways, including

- Researching
- Using apps to practice newly learnt skills.
- Recording video clips to insert into presentations.
- Using apps like Book Creator / Puppet Pals to publish work.
- They are also used to help students who require assistive technology to access learning activities.

If required, staff can group all the iPads in the school to use for a whole class activity.
